## Wellbeing in PP – Year 2

Wellbeing in Pre-Primary to Year 2 is defined by acknowledging and identifying emotions and then being able to recognise how confident and responsive learners look, feel and interact with one another.

Together with the IB Learner Profiles, School Pillars and Values, we use the “UR Strong” and “You Can Do It” programmes. The students are equipped with explicit social and emotional strategies to assist them,

and in doing so, learn to make good choices and responsible decisions when managing challenging situations in a brave and constructive manner. Furthermore, these learnt strategies give the students a voice and cause them to feel safe in their learning environment. Our students begin to look out for others and the differences that they can make, through self-awareness of ones’ own actions, in building strong relationships with others.
